SUMMARY

Started coding in 2015, I developed a passion for this profession and I made it my vocation. From 2018 to now, I have created many web site and application projects using mainly React.js, Next.js, Node.js/Express, PHP/Laravel and many other web technologies.

SKILLS

Languages: JavaScript, HTML5, CSS3, PHP, a bit of Python

Frontend: Built frontend projects for research and in Freelance using Mainly **React/Redux**, Used **Next.js** for Landing Pages, Static Websites and Full Stack projects, **SASS/LESS**, **Bootstrap**, **Tailwind**, **Material UI**

Backend: Consuming data from RESTful & GraphQL APIs, Building Servers and APIs services in **Nodejs/Express**, Created e-commerce and other full stack applications in **PHP/Laravel**, Comfortable Using **MongoDB** and **Mongoose** as an ORM, Experienced with **MySQL/PostgreSQL** and **Sequelize**, **Laravel Eloquent**

Tools & Methods: Git, Github, CI & CD, TDD, Heroku, Netlify, Vercel, Responsive Web Design, UI/UX, Chrome Dev Tools, VS Code, PhpStorm, CMS, SSL, DNS, Hosting, etc

Professional Skills: Pair-Programming, Clean Code, Data structures and algorithms, etc.

EXPERIENCE

HIGHLIGHTED SIDE PROJECTS

[Afro Devs](#): Social network of African developers, designed while learning the MERN Stack and FullStack JavaScript development

[Victim's Hope](#): Website for a local humanitarian NGO created with Next.js & Tailwind.css

[React Gorest](#): React frontend consuming Go REST API, built with React, axios, bootstrap

[Bujamart](#): An E-commerce application built with Laravel 8, Bootstrap, Laravel Collective, Stripe

And many other open source projects on my [GitHub](#)

PROFESSIONAL EXPERIENCE

- *Jan 2022 - Now:* **Software Engineering Intern (Internship) - Fyatu.com**, I am learning to develop web applications in **PHP** and I mainly use **CodeIgniter** as a framework, I have the opportunity to work with **Laravel** and **Vue.js** at the same time
- *Sep. 2020 - May 2021:* **IT Officer - BeiPoa.net**, The company being specialized in online shopping assistance, my mission was to automate tasks by developing **algorithms** and web applications in **PHP/Laravel, React.js, Vanilla JavaScript**, etc.
- *August 2018 - Now:* **Co-founder & CTO - Nurugenius.com (Part-time)**, As the CTO of the company, I was responsible for building and designing the platforms used for our E-commerce Service, E-learning, Company Websites and i've helped created dozens of websites and applications for our local and international clients.

EDUCATION

2018 - 2021: Université Sagesse d'Afrique (Bujumbura): **Bsc in Computer and Network Maintenance**

2016 - Now: OpenClassrooms: Several trainings related to Web development

2019 - Now: FreeCodeCamp: Courses about **Responsive Web Design, JavaScript, Data Structure and Algorithms**, etc

2011-2018: High School Diploma in **Math & Physics**
